

Compact, lightweight.
Movable microphone arms.
The ideal Web conference microphone speaker

Conference Microphone Speaker
PJP-25UR(B)

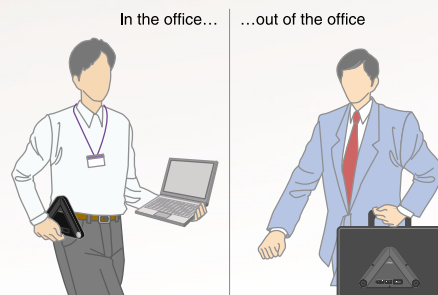

**No headset required.
Multiperson Web conferencing.**

The PJP-25UR is a Web conference microphone speaker. Usually people join Web conferences one at a time by plugging in a headset, but the PJP-25UR enables multiple persons to join simultaneously.

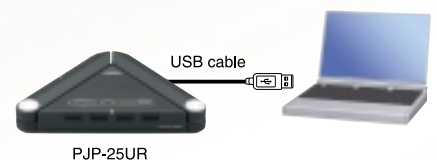

**Compact, lightweight.
Easy to carry.**

The PJP-25UR conceals itself neatly in a B5-size laptop bag, and weighs a mere 570 grams. Because it's easy to carry, you can join a Web conference from any small space in the office or when out on a business trip.

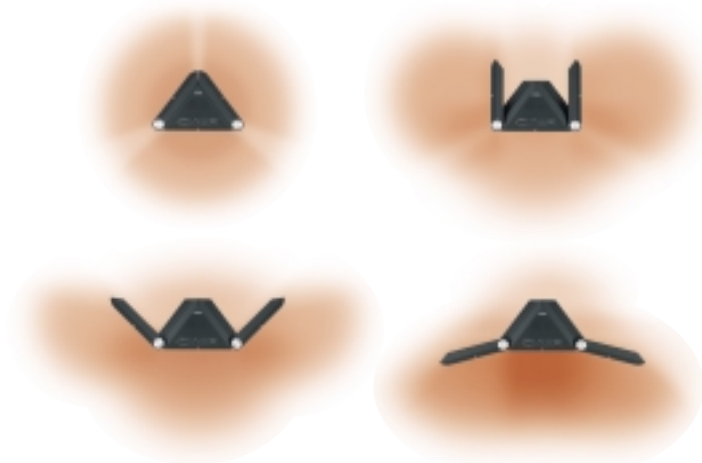

USB bus-powered.

The PJP-25UR runs on USB bus power. It's simple to use. Just connect a USB cable to any PC. Even under USB bus power, the PJP-25UR gives playback powerful enough for meetings, presentations, and music.

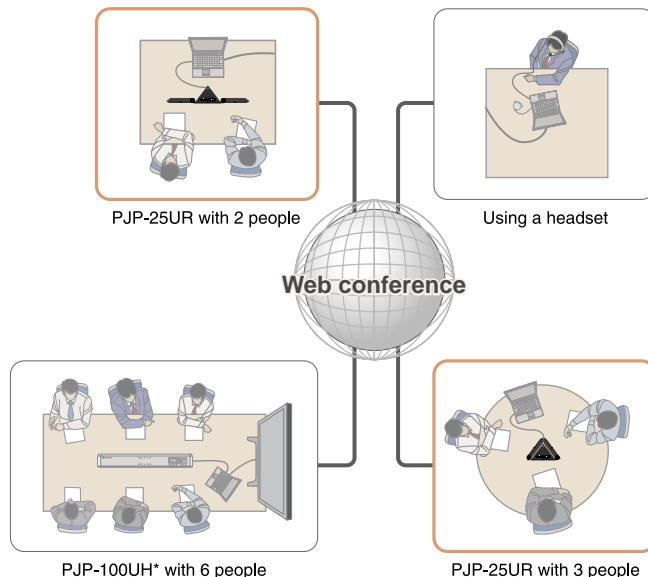

Never before seen in a Web conference microphone speaker! The PJP-25UR's movable microphone arms

One of the features of the PJP-25UR is its movable microphone arms. By moving the microphone arms to change the pick up range, Web conference participant voices are picked up and transmitted clearly even in locations with some degree of ambient noise such as small spaces in offices. And by changing the angle of the microphone arms, the PJP-25UR adapts to the seating arrangement.

Linking the PJP-25UR to a Web conference provides multipoint, multiperson conferencing.

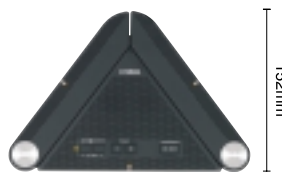

* Yamaha sells products other than the PJP-25UR for use as microphone speakers for Web conferencing. Visit Yamaha website.
